

Statement on COVID-19

Nationally, we are continuing to watch the development of the COVID-19 outbreak.

As a company, we are being proactive to protect the health and safety of our teams at all of our locations and the communities in which we work.

At this time, we have implemented measures within our organization to help prevent the exposure and spread of COVID-19 at all of our locations.

We will continue to monitor the situation at a national level and adhere to the guidance within each of the states we conduct business in.

The best way to prevent the spread of infection is to take care of yourself. Continue to make sure you're washing your hands with soap & water or hand sanitizer frequently, and practice social distancing.

It is natural that circumstances like this create anxiety. However, it is important that we keep calm, follow the advice and guidance of government health authorities, and use common sense when evaluating our own health and well-being.

We thank you in advance for doing your part in helping to prevent the spread of this virus and will continue to update this page should there be any change in our business continuity plan.
